March 2, 1991

I am a licensed acupuncturist in private practice. I recently purchased the Alpha-Stim CS and have been very pleased with its performance. One patient was suffering from an acute shoulder pain. After one 20 minute treatment with the Alpha-Stim CS, her pain was greatly reduced. By the following day the pain was completely gone. A second patient had been suffering chronic neck and shoulder pain. After one 10 minute treatment, she reported that the level of pain was lower than it had been for 9 months. Her relief lasted for over a week. After the 2nd treatment her condition continued to improve.

As an unexpected side effect, general patients reporting have "the best nights' sleep they have had in a long time."

I have only had the Alpha-Stim a short time, but I am very pleased with the results. I anticipate using it as an integral part of my practice.

Sincerely,

Jackie Stein, L.Ac.
